

Clefer
for Teachers

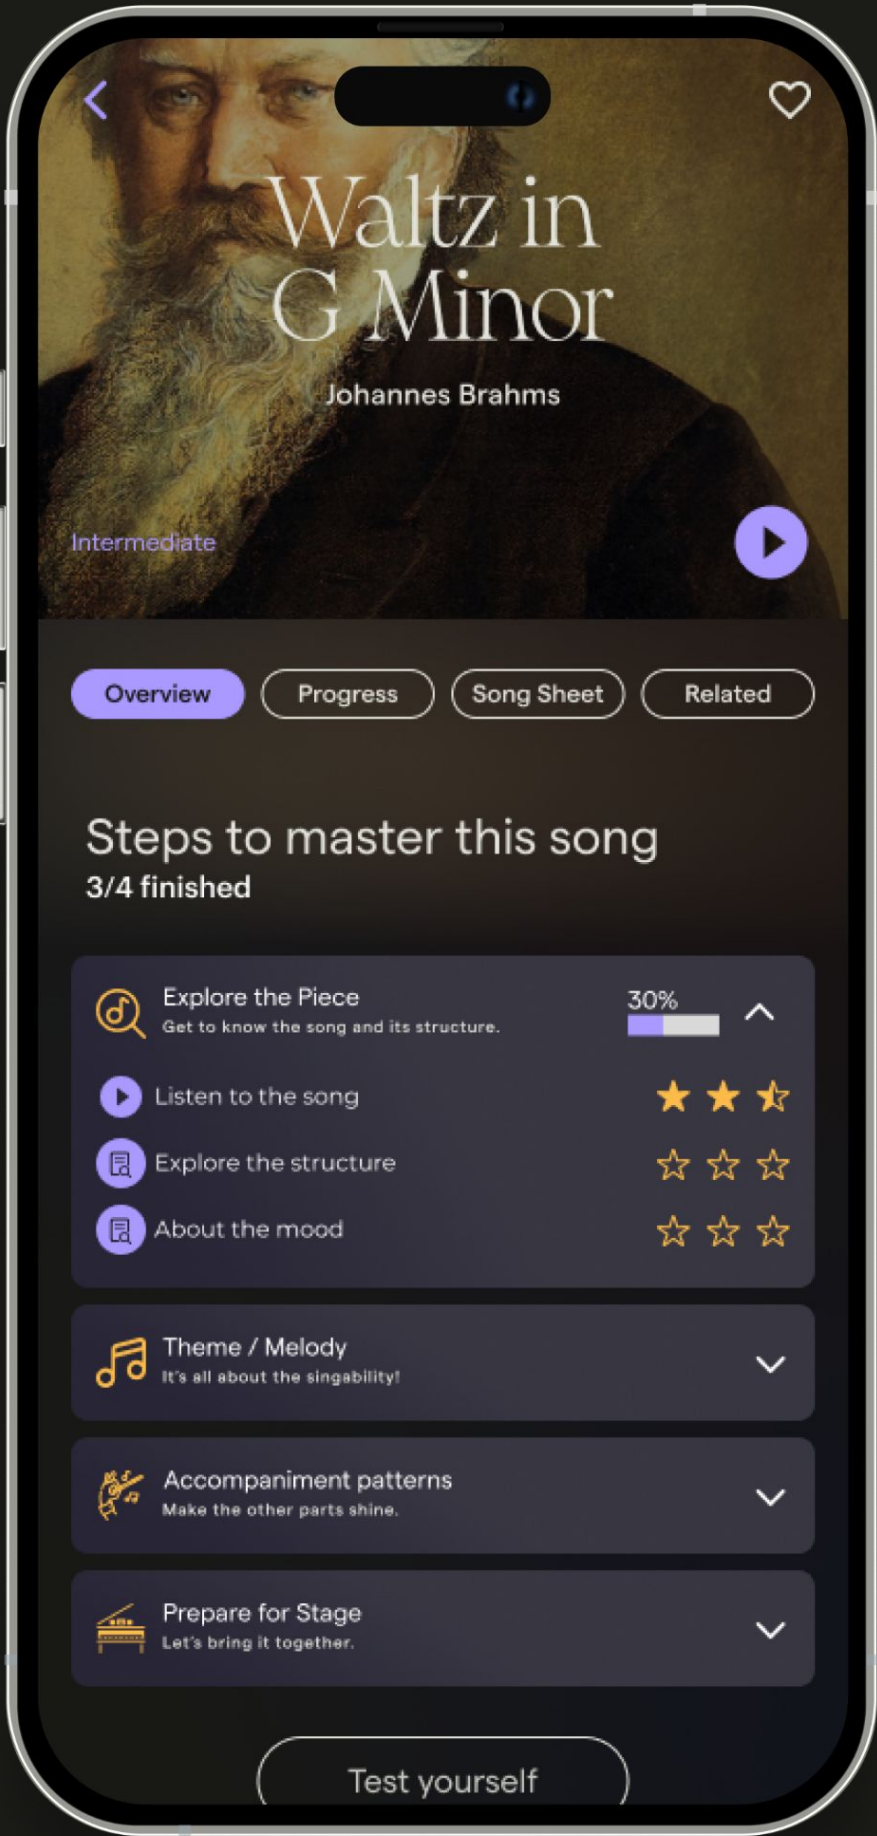

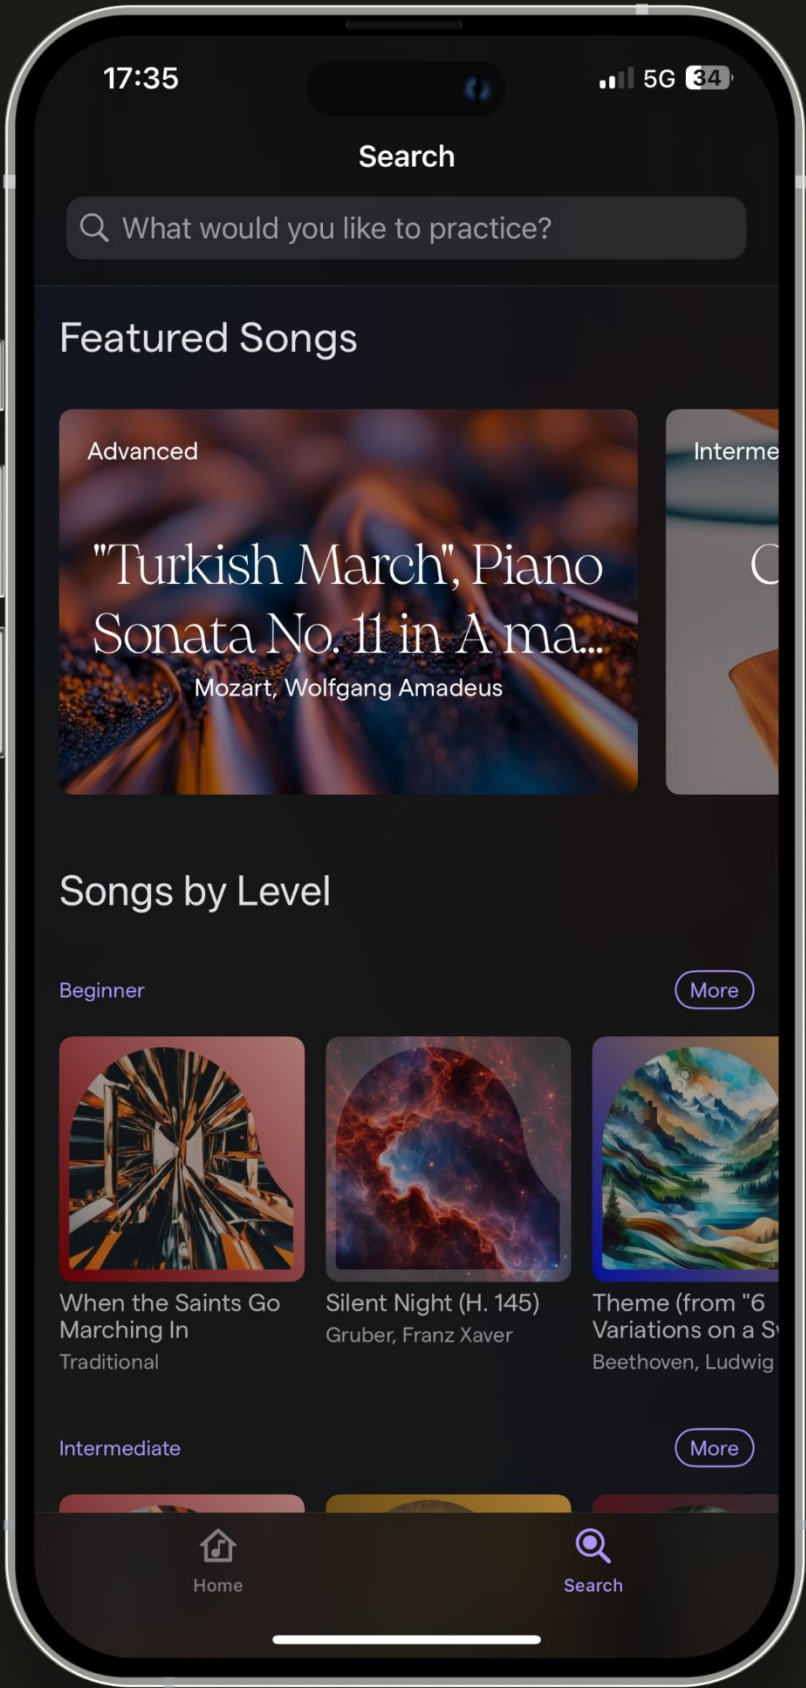

Clefer

What is Clefer?

Clefer is a new piano practice app designed for teachers and students

Soon available on Android.

Personalized, real-time
feedback.

Proprietary sound
recognition technology

Practice exercises for each
music piece

Multiple modes
of practice

Interactive sheet music

Patented Rhythm Trainer

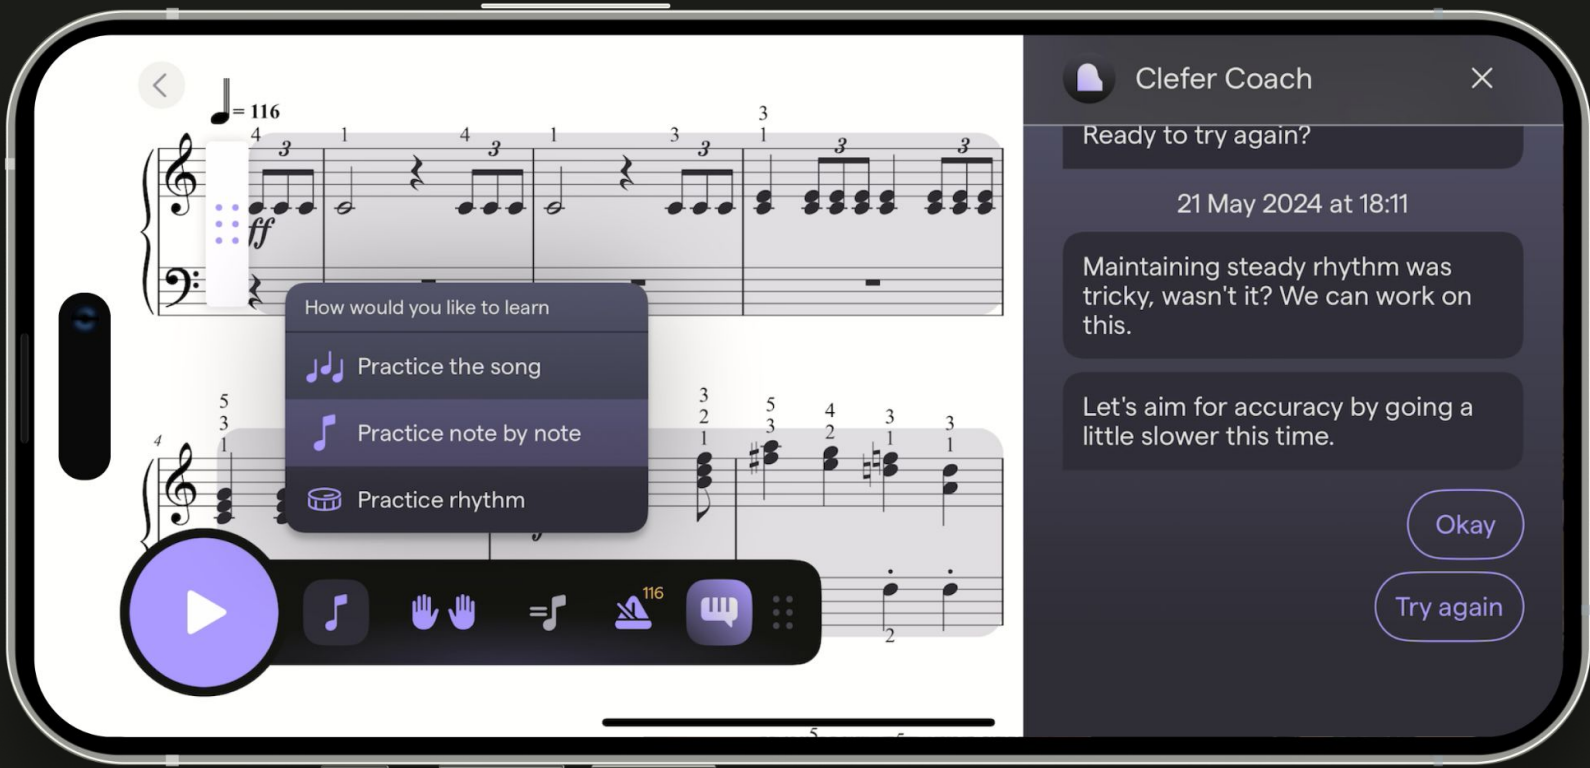

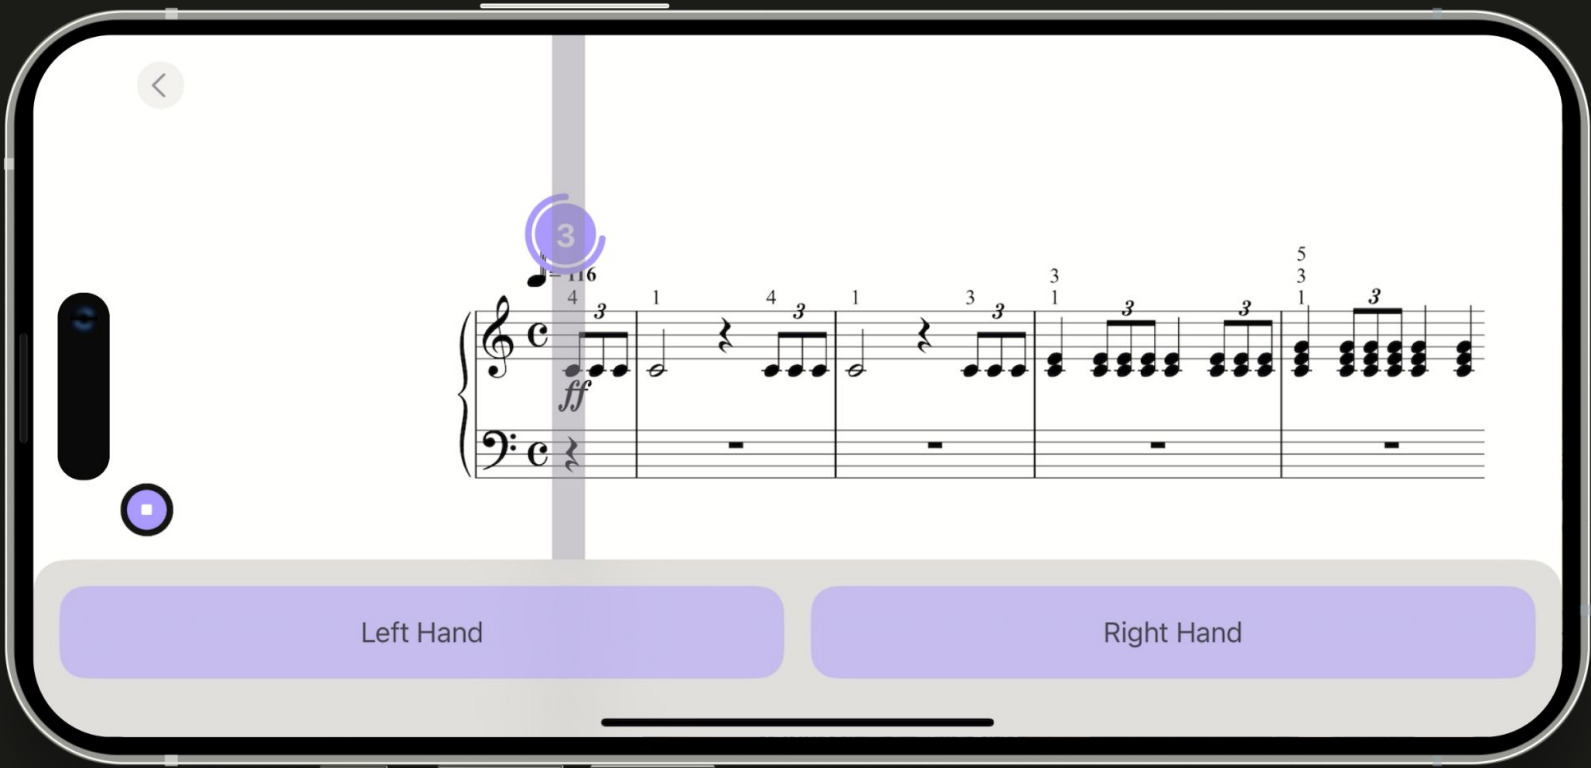

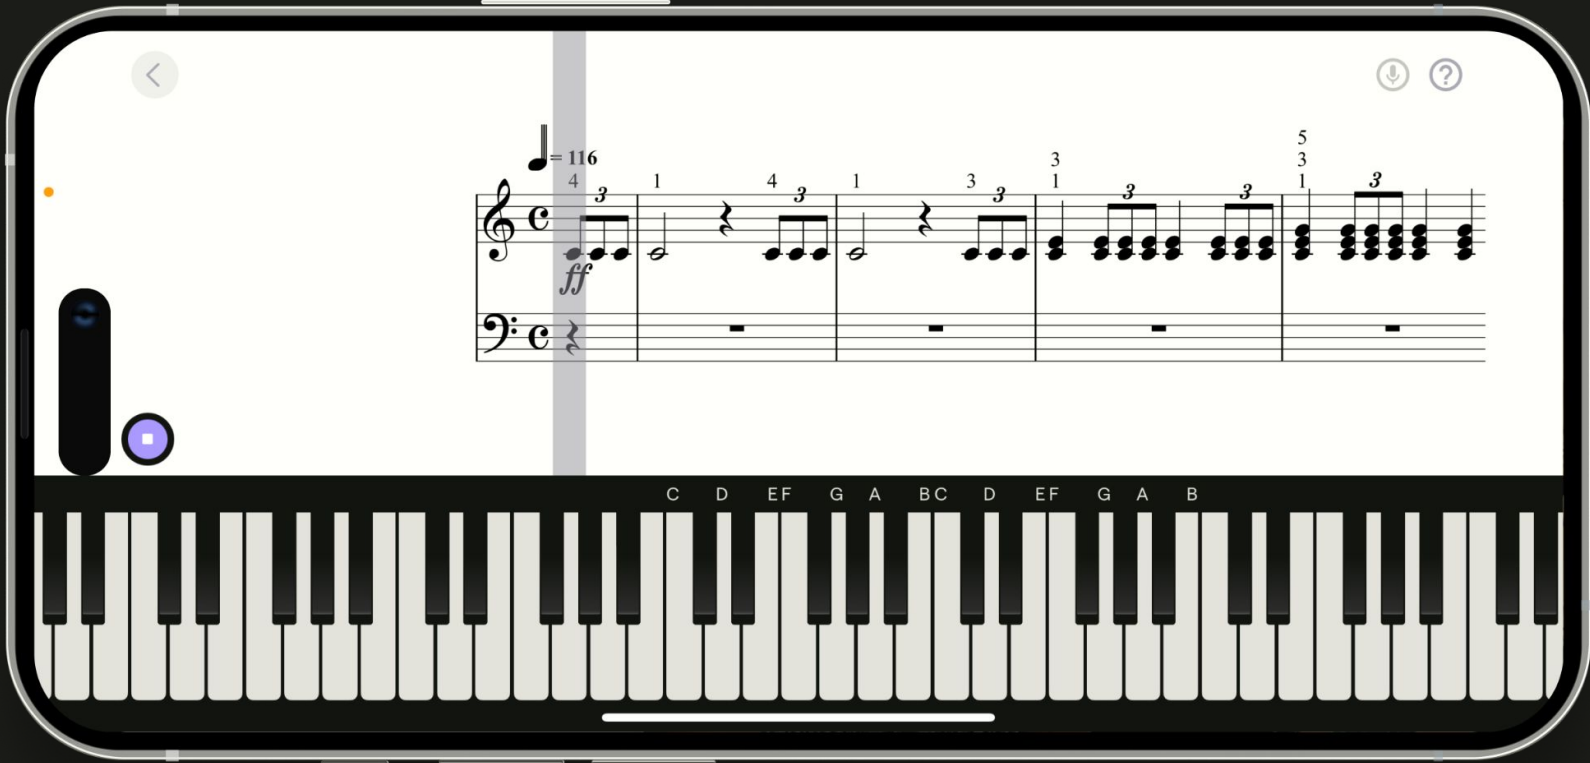

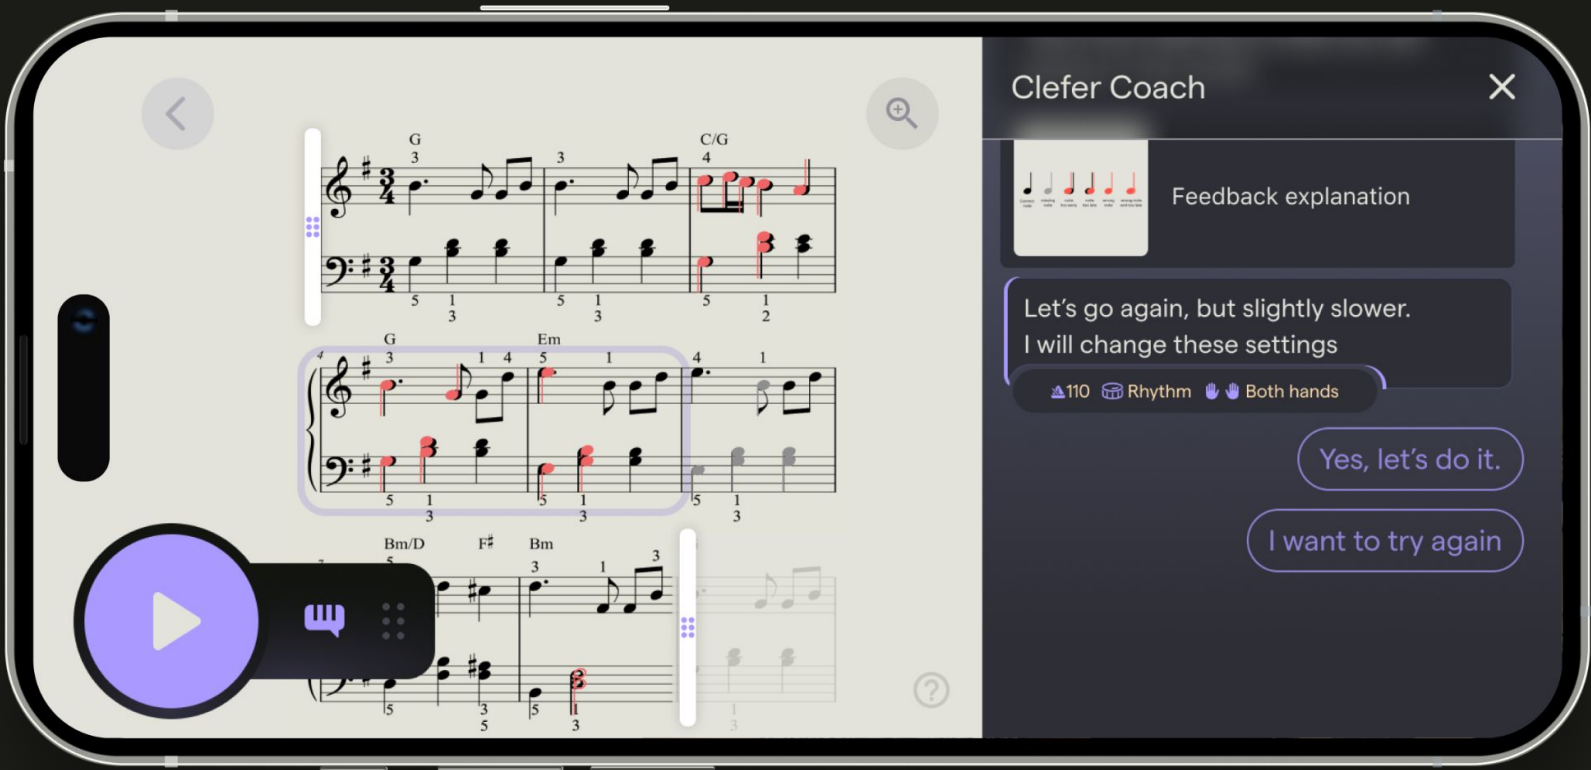

Proprietary Sound Recognition Technology

Our Clefer Coach, recognizes acoustic music notes in **real time**, analyzes your students' performance, provides feedback, and suggests follow-up activities to improve their skills.

It makes use of cutting edge proprietary technology to perform real-time piano **transcription**, align and compare your performance to the sheet music, visualize challenging passages, and formulate **feedback** and **recommendations** based on current and past interactions with the app.

The Clefer Coach also keeps track of students' plays, showing you how far they've **progressed** while practicing different music pieces.

A Proprietary Sound Recognition Technology

Why Clefer? Clefer's Unique Strengths

Empowering Teachers

Clefer's personalized, **real-time feedback** during practice lets teachers focus on what they do best - providing high-quality, personalized lessons.

Clefer **reduces the time spent correcting mistakes**, freeing up time for creative teaching and musical expression.

Key Features That Benefit Teachers

Teachers can assign **different practice modes** and set the tempo to match each student's proficiency so to suit individual student needs.

Designed with **simplicity** in mind, Clefer aligns with existing teaching and grading methods.

Engaging Students

Clefer keeps **students motivated** with interactive feedback and motivational features.

It promotes **daily practice** in an enjoyable way, helping students stay engaged.

Testimonials

Clefer helps you progress based on methodical steps that the Coach maps out for you. It provides achievable goals and intermediate steps so that motivation is maintained and learning happens effectively.

Emilie, Teacher

Often, practicing can feel monotonous and repetitive. Clefer has changed that for me by providing a companion that makes the experience engaging and enjoyable. The app’s interactive features keep me motivated and excited to practice every day.

Sam, Student

The Clefer app makes playing a real pleasure for students by following along while they play. My students enjoy using it, which significantly improves their practice experience.

Govert, Teacher

I’m interested in Clefer’s motivation features. Discipline is so essential, and the app provides the stimulation I need to stay on track. With Clefer, I’m not only motivated to practice but also to improve continuously.

Matt, Student

The Clefer app benefits teachers, students, and independent learners alike. Its comprehensive approach offers enormous potential, making piano education accessible to many.

Rene, Teacher

Clefer is a great addition to my piano lessons. It helps my students study independently and progress in their studies when I am not there. So then together we can do the fun stuff.

David, Teacher

I really find value in the feedback on what I play. Clefer’s real-time insights help me identify areas for improvement and refine my technique. It makes my practice much more productive.

Anna, Student

With Clefer, piano education keeps up with the digital revolution and better connects with the students’ world.

Marjo, Teacher

Our Teacher-Focused Philosophy

Clefer was co-developed with music educators to address the needs of piano teachers and create an optimal learning environment for both teachers and students.

We understand the effort it takes to keep students motivated. That's why Clefer was developed with teacher feedback in mind, and we regularly update the app with new features to better support your needs.

Join us

We firmly believe technology becomes powerful only when it complements traditional teaching.

We noticed a gap in the world of 'fast-learning' apps. That's why we partner with piano teachers to create Clefer, designed to help students not just play, but play with confidence and deep understanding.

We're actively seeking to connect with associations and passionate teachers to partner with us in adopting and testing Clefer to inspire and enrich their students' experience.
